EDUCATION

Iowa State University

Bachelor of Science - Cyber Security Engineering

Ames, IA

Graduation Dec 2026

Des Moines Area Community College

Associate of Science - Computer Information Systems

Ankeny, IA

Jan 2022 - May 2023

EXPERIENCE

Adventure Program Specialist

Iowa State University

Aug 2023 - Present

Ames, IA

- Manage climbing wall operations by delegating tasks during classes and wall resets
- Collaborated weekly with professional staff to organize competitions, trainings, and foster employee relations
- Increase related club engagement by 50% by developing efficient communication lines to club executive members

Network Intern

Unity Point Health

Aug 2022 - Jan 2023

Des Moines, IA

- Configured 250+ access points to install across 15+ clinics/hospitals across Iowa
- Documented UPS serial numbers and updated spreadsheets to determine clinics in need of new hardware
- Streamlined lab setup and organization to engineers' specifications thereby increasing project efficiency

PROJECTS

Personal Homelab | *PFSense, Proxmox, Linux, Portainer/Docker*

- Deployed a homelab using Proxmox running multiple VMs using various linux distributions
- Built a firewall using a Lenovo m920q and PFSense to protect and allow access to self hosted services
- Implemented network segmentation on a managed Cisco switch for traffic isolation and security

MIPS Processor | *C, MIPS assembly, VHDL*

- Collaborated with team members to design different MIPS processor software and hardware architecture
- Developed assembly programs to stress test processor design that revealed the strengths/weaknesses of our design
- Documented performance differences between different stages of processor design finding a 101% increase in cycle frequency

Wi-fi Strength Heat Map | *Ekahau*

- Tested the strength of access points in a large hospital to reveal dark areas where weak signal could impact medical device capabilities
- Communicated with nurses and support staff to maintain patients' comfort while performing signal strength scans
- Presented findings to project lead and assisted in designing new access point grid to cover high priority areas

TECHNICAL SKILLS

Languages: Java, C/C++, python, bash

Developer Tools: Git, VS code, command line, Linux/Windows/macOS
